

## **Environmental Policy Statement**

Our Environmental Management System scope has been determined as:

**The Spring water abstraction, filtration, filling, raw material procurement, packing, cleaning and storage of all packed formats at the Harrogate site.**

Harrogate Water Brands Limited which incorporates Harrogate Spring Water Limited & Thirsty Planet Limited will conduct its business with respect and care for the environment. This will be achieved by implementing environmental strategies that involve and benefit our stakeholders as well as the resident communities local to our operational site.

Harrogate Water Brands Limited is committed to protecting the environment and:

- Compliance of all applicable UK acts and regulations with respect of the environment and all system requirements in relation to the identified significant aspects.
- Minimising the extent of environmental impacts of operations within the Company's sphere of influence and abstraction
- Conserving energy through minimising consumption and maximising efficiency
- Where possible, minimising the environmental impact of procured materials
- Packaging light weighting optimisation
- Promoting efficient purchasing to help minimise waste and allow materials to be recycled where appropriate
- Controlling any emissions or effluents which may cause environmental pollution within its operations
- Implementing the waste hierarchy whilst ensuring Zero to landfill from site
- Improving awareness and training of employees in environmental best practice
- Continually developing, monitoring and improving procedures relating to the environmental management system.
- Monitoring environmental performance, making regular reviews of the policy and environmental management system.
- Setting SMART environmental objectives and targets
- Maintaining an ISO14001 certified Environmental Management System

This policy is available on demand to interested parties via e-mail.

The **Managing Director** is responsible for the setting of the environmental policy. This will be achieved by the provision of the necessary resources and monitoring of progress.
